#### **UX/UI** Design

Leonardo Worldwide May 2018 - June 2020 Full Time

**UX/UI** Design

Various Agencies Sept 2017 - April 2018 Contract

In a digital secure environment, I work with stakeholders and clients to advise on web components and information architecture. As a part of a creative studio team, I also manage timelines and billing for hours. Prototyping with Figma and Sketch, I helped publish several Tier 1 projects which affect upwards of 20,000 active users.

As the primary UX Designer for the Private Label department at KAR Global, my responsibility is to enhance their OLiQ technology which is utilized by over 50+ automotive brands. Interacting with multiple Product Owners and Product Managers on a daily basis, we iterated new publications which enhanced a legacy application.

Leonardo is an image distribution company for the hospitality sector. After 20 years in business, various other products were developed. In my role, I was tasked to understand each product and to lead their corporate redesign. Projects include: the new media library, vbrouchure redesign, and the massive overhaul of vscape.

Working in various environments as a contracted UX/UI designer: The Exchange Lab, Corus Ent, Ruby Life. For each project, I face new stakeholders and given the responsibility of immersing myself into new products and tailoring them for their desired persona.
